# Ideas Come First

Behind every invention is an idea. Behind America's high standard of living are the fruitful thoughts of men.

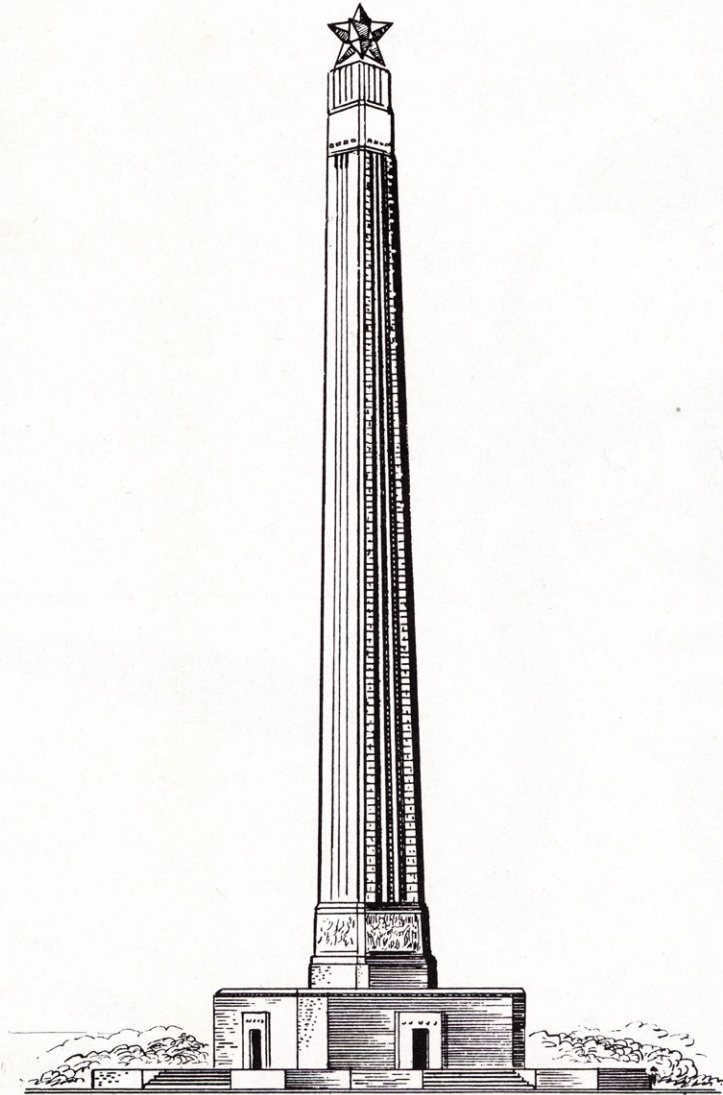

This is especially true in the petroleum industry, which has contributed so much to the nation's economy, comfort and protection.

At Shell's series of research centers across the nation, skilled scientists from the world's great universities are constantly seeking and proving out new ideas that will help oil do an even better job for you.

## NO BRIGHTER FUTURE EVER CALLED

Eternally the eyes of youth replenish a worn world's vision of greater life, where luxuries are made commonplace and necessities abundant. Each generation sees its Pasteur, its Marconi, its Charles Martin Hall emerging from the humble dreamland of basement science to change more visions into realities for the greater leisure, wealth and health of all mankind.

But never have young chemists been able to look into a more rewarding future than now, when the full flowering of industrial chemistry is surely just ahead. Today's growth of industry sinks taproots into chemistry, because basic chemicals, such as DIAMOND makes, are essential to every industry, everywhere. In DIAMOND's own expanding laboratories, alert young visionaries are being offered challenging new life-goals in this exciting age of chemistry.

By now you have looked through the pages of the 1957 Pasadenian. As you turned the pages did you notice the many new features?

Using color to carry out the abstract lines and the theme of "Keys," we have tried to record the 1956-1957 school year in story and pictures.

Among the new features is the Who's Who in the Personalities section. In this Who's Who we have endeavored to recognize those students who have received honors other than through student elections.

Another new feature is the index. The names of all students according to classes and the page numbers on which each student's pictures appear are included. In addition, we have given the usual senior information by each senior's name.

This book could never have been produced without the full co-operation of the students and faculty of P.H.S. We wish to express our thanks to these people and to a wonderful staff and sponsor for their untiring efforts to make this book better than ever.

If we have recorded the highlights of this year so that each time you look through this book a wonderful school year will be recalled to your mind, then our goal has been achieved. This is your book just as you have made it through your activities, and we hope you enjoy this, your,

1957 PASADENIAN.
